
PACKAGING FOR TRANSPORT AND STORAGE OF LEADER USAR KITS

Each kit is packed in a backpack, itself placed in a hard, waterproof case.

Benefits:

In the field, the rescuer has two options:

- To just carry the backpack for easier transport and a lighter load by leaving the heavy case behind
- To carry the whole unit

In both cases, the equipment stays protected.

Kit composition:

Depending on the chosen configuration, the kits are packed in 1 or 2 backpacks. The unit is delivered in 1 or 2 hard waterproof cases for storage and transport in an active area:

- A backpack including the equipment for easy transport by the rescuer in the field.

- A hard IP67-rated waterproof and shock-proof case.
